AP6108 Advanced Chain Drive Hoist (ACDH)

Changing APU's is now quicker, safer and substantially easier with Morgan Aero Product's new 1,000-lb. capacity Advanced Chain Drive Hoist (ACDH). Designated the AP6108, this new ACDH by Morgan Aero Products raises and lowers all Boeing APU's including B777 and B747 APU's, directly to and from ramp surfaces in one safe, smooth operation.

Thanks to the Morgan ACDH, need for auxiliary platforms and fork lifts is a thing of the past for the B747 and B777.

For negotiating tight clearance, the Morgan Aero ACDH features a simple, ratchet-action control with easy, partial or full turn cranking.

For more information on ordering the AP6108 ACDH, contact:
